

THE SOLUTION

To unlocking the potential of small landfills.

Extracting every ounce of energy and revenue from closed landfills makes good sense, both economically and environmentally.

Unique power generation solutions for your landfill resource.

Save what you are currently spending on landfill aftercare.

Sustainably maximise your landfill resources.

Achieve major savings whilst improving carbon accounting and sustainability.

Save up to £750,000
on landfill aftercare costs with Alphagen systems.

“There are few companies, and specifically people such as Alphagen and Richard Tipping who are willing to operate old landfill gas fields, and who have the knowledge, ability and enthusiasm to do this.

I have no hesitation to recommend Richard and Alphagen to operate a landfill gas system.”

Charles Wright - Landfill Strategy Manager
Norfolk County Council

Time is short.

Support for small landfill gas projects ceases in 2017.

www.alphagenrenewables.co.uk

Unique power generation solutions for your landfill resource.

- Successful track record on projects considered uneconomic by established contractors
- Significant Carbon Footprint reduction
- Projects from 45kW and above
- Gas flows from around 100 m³/hr
- No capital purchase or charges
- Sound financial backing through Albion Community Power
- Unique approach from assessment of gas field to deployment of proven technology
